INREACH® SATELLITE COMMUNICATORS

INREACH®

Compact satellite communicators for hikers, climbers and remote travelers with two-way messaging beyond cell service[1].

GPSMAP®

Rugged, high-performance GPS for serious outdoor users and expeditions teams who want advanced navigation, detailed mapping and built-in satellite communication in one device with touchscreen and buttons.

MONTANA®

Large screen, all-purpose handheld for overlanding expeditioners, backcountry explorers and adventure users who want easy-to-read maps, flexible routing and satellite communication features on longer trips.

[1]Active plan required. Some jurisdictions regulate or prohibit satellite communication devices; it is the user's responsibility to know and follow all applicable laws. • [2]Assuming typical use with SatIQ™ technology • [3]Purchase an Outdoor Maps+ plan for access to a wide variety of premium mapping across the globe. Content is regularly updated and delivered directly to your compatible Garmin device via Wi-Fi connectivity. You can also access your Outdoor Maps+ content with the Garmin Explore app. • *Bluetooth Low Energy technology • The Bluetooth word mark and logos are registered trademarks owned by Bluetooth SIG, Inc. and any use of such marks by Garmin is under license.

INREACH TECHNOLOGY

With an active inReach plan, products enabled with inReach technology can trigger an SOS message or exchange text messages outside of mobile network coverage[1].

INREACH PLUS TECHNOLOGY

With an active inReach plan, products enabled with inReach Plus technology can trigger an SOS message or exchange photos, voice messages and text messages outside of mobile network coverage[1]. Photos and voice messages can give rescuers clearer, faster context than text messages alone, helping them assess the emergency more accurately.

GARMIN RESPONSE℠

When you trigger an SOS message, you're connected with Garmin Response, a 24/7-staffed international coordination centre. It is a world leader in emergency response coordination services and is a global search and rescue coordination centre for supported emergency notification devices with active inReach plans[1].

GARMIN EXPLORE APP

This all-in-one app is made for off-the-grid adventurers and outdoor enthusiasts alike. Download to your compatible smartphone and pair with your compatible GPS devices so you can plan, navigate and review your next great adventure.

GARMIN®

OUTDOOR HANDHELDS

See other side for Garmin devices with inReach® technology for global two-way messaging and interactive SOS[1].

ETREX®	GPSMAP®	MONTANA®
Rugged, essential GPS handhelds with long battery duration or solar charging plus optional touchscreen and maps. Ideal for hikers and outdoor enthusiasts.	Rugged GPS handhelds with options for touchscreen, buttons and longer battery life. Dedicated navigation for outdoor explorers who need advanced mapping, accuracy and durability.	Rugged GPS handheld with a versatile large screen. Ideal for adventure travelers who want easy viewing, flexible mapping and all-around outdoor performance.
